To Whom It May Concern,

Greene and Associates, Inc. is a company in the field of plumbing and mechanical that I can strongly recommend as a sub-contractor for any project you may have relating to such work. They have the skilled manpower and resources to complete nearly any size project. They work efficiently and cooperatively. The crews and supervisors are very knowledgeable of their trade and are particularly good at problem solving issues that always arise as part of any renovation project. They are always mindful of project timelines and budgets.

GC&SU has employed Greene and Associates several times in the past 8 years for various sized construction projects and mechanical/plumbing repairs. Most recent was the \$10 million dollar, "Renovations to the Old Governor's Mansion" project that began in 2000 and was completed in 2004. Greene and Associates worked as a subcontractor for Garbutt/Christman Construction. Everyone who worked on this project had to be extremely sensitive to the historic nature of this project and had to be pre-qualified and proven competent to work in such an environment. All the mechanical and plumbing systems were engineered to be unobtrusive. The mechanical system was engineered to be sensitive to internal climate changes and is a rather complex system. The Old Governor's Mansion Project also won a Historic Preservation Award in 2005.

GC&SU is very satisfied with the performance and work ethics of Greene and Associates and will continue to do business with them in the future. If you have any questions or wish to discuss their qualifications with me further, please feel free to contact me at (478) 445-4467.

Sincerely,

John E. Webb
