Macon, GA 31208

Re: Central Kitchen and Career Center

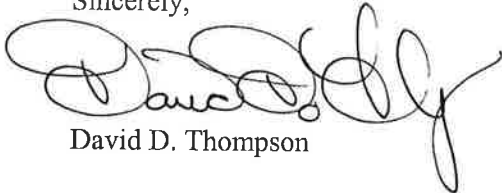

Dear Chip,

I wanted to thank you for all of your help during the past year. The Central Kitchen and Career Center was an extremely difficult project due to the overall complexity and time frame imposed upon the project. Your company excelled and we could not have completed this project on time without your help.

I can also report that all parties with The Board of Education are extremely pleased with the project and are quite proud of their new building. They have extended an open invitation for all parties to review the building with prospective clients. I hope you have the opportunity to use this invitation in the near future.

Thanks for all your hard work.

Sincerely,

David D. Thompson
